

INFORMATION SHEET

Refined Scored Porcelain Tiles

Earthforge is an Australian-made porcelain tile collection inspired by weathered surfaces, aged materials and the enduring beauty of handcrafted ceramics.

Rich in depth, movement and texture, Earthforge combines a rustic colour palette with subtle antique glaze effects to create surfaces full of warmth, character and authenticity. Designed to celebrate variation and imperfection, the collection delivers a timeworn aesthetic that feels both grounded and sophisticated.

Available in seven earthy colourways and a choice of Gloss or Satin Matt finishes, Earthforge is suitable for all walls, floors, internal and external and swimming pool applications. The Satin Matt finish achieves a P3 slip rating, making it ideal for areas where additional slip resistance is required.

Earthforge is manufactured with six unique faces and a V3 Moderate Variation rating, creating natural movement and variation throughout an installation.

INSTALLATION MADE SIMPLE

Earthforge has been developed as a pre-scored porcelain tile, allowing installers to achieve the appearance of individually laid mosaic-style tiles while reducing installation time and complexity.

Each 300 x 300 mm tile is factory scored and available in two formats:

- **Bejmat** – scored to 150 x 50 mm elements
- **Squares** – scored to 75 x 75 mm elements

The score lines are manufactured at 2mm wide and are designed to align with standard 2 mm tile spacers, creating a consistent grout joint throughout the installation.

The result is a cleaner, more efficient installation process while maintaining the refined handcrafted aesthetic of individually laid tiles.

INFORMATION

Standard service and handling fees apply to all purchase orders.

Priced by the box (10 tiles per box / 0.90m² per box).

Earthforge tiles are made to order. Please speak to your tile store regarding current lead times.

Sample tiles are available to assist with colour selection.

From time to time, raw material availability may change, requiring the use of alternative suppliers.

We recommend ordering a sample to review the current production of the tile before placing an order.

Consider your order quantity carefully as there are no returns with this product.

Please visit our website to view room setting images and installation inspiration for your selected colour and finish.

INSTALLATION

Earthforge tiles are manufactured with 2mm score lines and should be installed using 2mm spacers.

To cut Earthforge tiles, we recommend a wet saw fitted with a continuous rim diamond blade.

We strongly recommend engaging a certified tiler for installation.

All Earthforge tiles must be grouted.

All installers working with SCC products are required to adhere to Australian Standard AS 3958:2023 – Installation of ceramic and stone tiles.

CARE AND MAINTENANCE

DO NOT clean Earthforge tiles with strong acid or abrasive cleaners.

We recommend using a soft sponge or cloth with a pH-neutral tile cleaner or white vinegar diluted with four parts warm water.

Chemicals such as bleach, ammonia, acidic cleaners and alkaline detergents can cause irreversible damage to tile surfaces and should not be used.

We recommend using a pH-neutral cleaner specifically designed for tiles. Southern Cross Ceramics recommends Spirit Neutral Cleaner products.
